Metabolism
Biosynthesis of other secondary metabolites (n = 25)
Xenobiotics biodegradation and metabolism (n = 21)
Glycan biosynthesis and metabolism (n = 18)
Metabolism of terpenoids and polyketides (n = 17)
Lipid metabolism (n = 16)
Carbohydrate metabolism (n = 15)
Amino acid metabolism (n = 14)
Metabolism of cofactors and vitamins (n = 12)
Energy metabolism (n = 8)
Metabolism of other amino acids (n = 7)
Nucleotide metabolism (n = 2)
Genetic information processing
Replication and repair (n = 6)
Folding, sorting and degradation (n = 5)
Translation (n = 4)
Transcription (n = 3)
Information processing in viruses (n = 2)
Environmental information processing
Signal transduction (n = 17)
Membrane transport (n = 3)
Signaling molecules and interaction (n = 1)
Cellular processes
Cell growth and death (n = 8)
Transport and catabolism (n = 7)
Cell motility (n = 4)
Cellular community − prokaryotes (n = 4)
Cellular community − eukaryotes (n = 1)
Human diseases
Infectious disease: bacterial (n = 11)
Drug resistance: antimicrobial (n = 3)
